**PURPOSE:** To assist in the completion of the construction and testing of residential, commercial, and industrial projects by providing sufficient electrical power to approved systems.

**CONDITIONS:**

- The building permit shall be active.
- The structure shall be secured and lockable.
- The structure's address shall be posted on the structure visible from the road it fronts.
- In reference to commercial and industrial, the electrical room or rooms shall be lockable.
- All systems to be energized shall be inspected and approved.
- In reference to residential, the electrical system shall be complete.
- Access to the structure from the public way shall be able to support emergency services.
- Temporary power will be granted for **ninety (90) consecutive calendar days**.
- No connections to any unapproved electrical systems.
- The structure shall not be occupied until either a Conditional Certificate of Occupancy or a Certificate of Occupancy is issued for the structure.
- All reinspection fees shall be paid prior to power being released for connection.
- **In reference to Commercial and Industrial, the Available Fault Current Rating (AIC) at the Building Service Termination Point shall be supplied by the Electrician and sealed by a Registered North Carolina Engineer.**

I have read, understand, and agree to the above conditions and will abide by same under which it is issued. I indicate my understanding of these requirements by my signature. I understand that failure to comply with all conditions and applicable laws will result in the disconnection of the utilities. I also understand that occupying this structure without a Certificate of Occupancy (CO) or a Conditional Certificate of Occupancy (CCO) is a violation of North Carolina General Statutes and will result in the disconnection of the utilities.
