**FOR IMMEDIATE RELEASE**

### **LEAK TESTING UNDERWAY AT TOWN HALL**

**WAKE FOREST, NC – November 28, 2011** – The Town of Wake Forest has contracted with Stafford Consulting Engineers to investigate the cause of numerous water leaks throughout the Town Hall building.

The assessment includes testing of certain windows and areas of flashing to determine the source and cause of leaks in the Town Hall building envelope. It also includes inspection of the roof and several areas around the foundation. Due to its comprehensive standards, the testing requires the removal of bricks to check flashing, as well as the removal of earth or pavers around the foundation to inspect waterproofing.

Visitors to town hall are urged to use caution in areas where testing is being conducted and be mindful of the potential for slick floors.

The leak testing is expected to be completed no later than Friday, Dec. 2.
