

TOWN of
WAKE FOREST

Inspections Bulletin

Subject:

GAS TESTING UPDATES

Bulletin Number:

2010-01

Effective Date:

9/7/2010

Beginning *SEPTEMBER 7, 2010*, The Town of Wake Forest Inspections Department will no longer allow regulators be a part of the testing of the gas system. Regulators are not designed to accept the pressures required to meet the minimum test pressures. This will apply to the rough-in test and the final test. After the line pressure tests are approved, the mechanical contractor will install the regulators and do their own test. At any time the regulators are installed during a pressure test, The Town of Wake Forest Inspections Department will reject that inspection as a "NOT READY INSPECTION".
