246 most casualty deaths for one day January 31, 1968

New, Larger Exhibit

Wake Forest is pleased to be among the first to host the new, larger exhibit, which includes a three-quarter scale Wall replica that is 375 feet in length and stands 7.5 feet high at its tallest point. With the new replica at this size, visitors will be able to experience The Wall rising above them as they walk towards the apex, a key feature of the design of The Wall in Washington, D.C.

1,500+ service members unaccounted for from the Vietnam War

The Wall Replica

Like the original Memorial, The Wall That Heals is erected in a chevron shape and visitors can do name rubbings of individual service member's names on The Wall. The Wall replica is constructed of Avonite, a synthetic granite, and its 140 numbered panels are supported by an aluminum frame. Machine engraving of the more than 58,000 names along with modern LED lighting provide readability of The Wall day and night.

Mobile Education Center

The 53-foot trailer that carries The Wall That Heals transforms to become the Mobile Education Center. The exterior of the trailer features a time line of "The War and The Wall" and provides additional information about the Vietnam Veterans Memorial in Washington, D.C. Additional exhibits give visitors a better understanding of the legacy of the Vietnam Veterans Memorial and the collection of items left at The Wall.

Name Rubbings

For the first time in the history of The Wall That Heals, visitors will be able to perform "name rubbings" of individual service member's names on The Wall.

West Panels

May 25, 1968 - May 5, 1975

Names are arranged in order of date of casualty and alphabetically on each day, beginning at the center with panel 1E (under 1959), down panel 1E, then moving right towards 70E, then 70W towards the center, and ending above the 1975 on 1W. The first and last casualties are side by side at the apex of The Wall.

- Find service member's name and location on The Wall in the paper directories or digital kiosk in the Mobile Education Center or through VVMF's The Wall app which can be downloaded at www.vvmf.org/app.
- Panel numbers are on the bottom of every panel. Row numbers count down from the top of each panel. On the margin of every other panel are white dots every 10 lines. Count down 4 dots and you're on line 40.

How to Find a Name on The Wall

East Panels

June 8, 1956 - May 25, 1968

Each name is preceded (on the West Wall) or followed (on the East Wall) by a symbol designating status.

- ◆ The diamond symbol denotes that the service member's death was confirmed.
- ⊕ Those whose names are designated by the cross symbol were in missing or prisoner status at the end of the war and remain missing and unaccounted for. In the event a service member's remains are returned or he is otherwise accounted for, the diamond symbol is superimposed over the cross.
- ⊗ If a service member returns alive, a circle, as a symbol of life, will be inscribed around the cross. No such cases have occurred.
